

# CoCowood

CoCowood Catalogue

*Eco-friendly container*

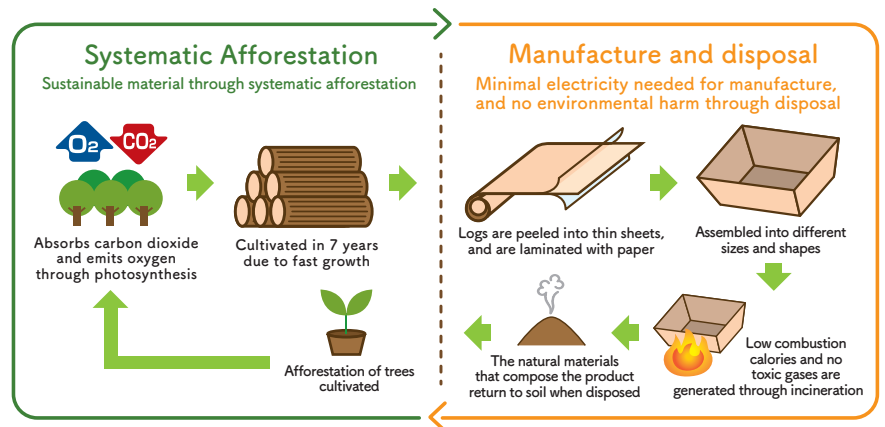

CoCowood is an eco-friendly container made from "falcata", a type of tree mainly afforested in Indonesia.

Falcata grows quickly and absorbs carbon dioxide at a high rate, making it an effective option in preventing global warming.

## What is "CoCowood"?

Systematically afforested falcata trees are cultivated and peeled into thin sheets, laminated with glassine paper, then cut and assembled into different sizes and shapes. The boxes are water resistant and compatible to different types of use such as microwave heating and freezing. Mainly composed of natural materials, CoCowood is a high-end, ecological, functional option.

## What is Falcata?

Falcata (Falcataria) is a genus of flowering plants in the legume family, and is mainly afforested in East Asia. Falcataria has the fastest growing speed out of afforested trees, and grows to about 15 meters in length, and 25~35cm in diameter in about 5 to 7 years. It can also grow in poor soils, making it adaptable to many environments.

Reference: Leaflet by the Indonesian Ministry of Forestry

## 3 characteristics of CoCowood

### 1. Significant reduction in inventory space!

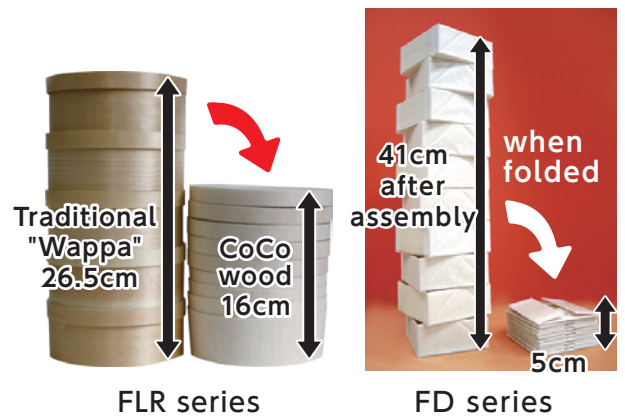

Compared to boxes with straight sides, the CoCowood products are angled, making them stackable and compact, saving inventory space and transportation fees.

### 2. Food contact compatible!

The surface is laminated with paper or film, allowing direct contact with foods and prevents splinters and wood grains.

### 3. Reasons for low prices and high quality

We import directly from our affiliated factories in Indonesia with no intermediary companies, which allows us to offer our products at low prices. We regularly inspect the factories, so you can use our products with confidence in terms of quality.

## SUSTAINABLE DEVELOPMENT GOALS

Olica Sangyo supports and contributes to the "Sustainable Development Goals" (SDGs) movement through ecological package manufacturing.

### Cookable with CoCoward

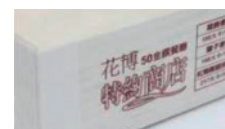

The Cocoward FLR series has excellent heat and cold resistance. For heating, we have records of use of 180°C for 30 minutes in the oven or microwave.

**180°C**  
**30 minutes**

### Printable (Top or sides)

The product is printable on the lid, as well as the sides, which was not possible with traditional wooden "wappa". Stickers or other decorations can now be substituted by printing directly on CoCoward to enhance its appeal and eliminate the need for post-processing (sticker pasting etc.).

### CoCoward can be custom-made We also accept custom orders. Please feel free to discuss.
